Activity and Info Pack

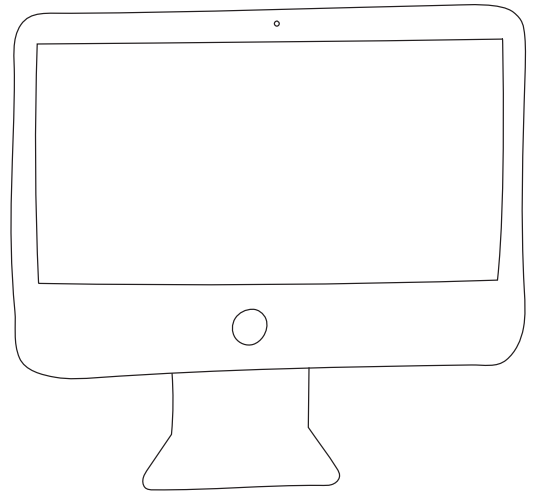

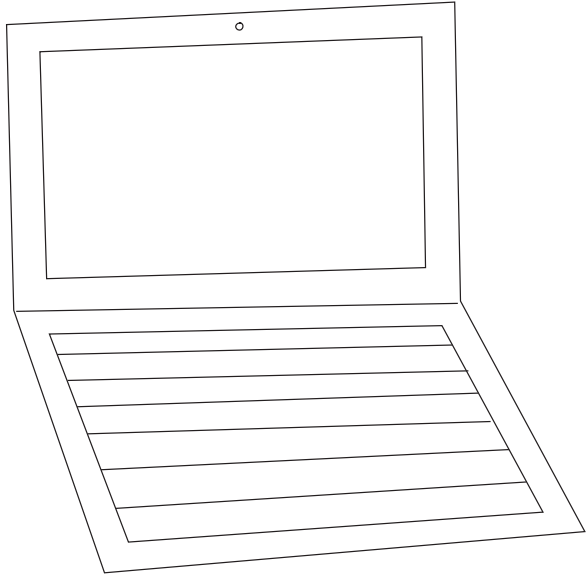

Everyone has the right to a standard of living adequate for the health and well-being of themselves and of their family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond their control.

The Universal Declaration of Human Rights
Article 25.

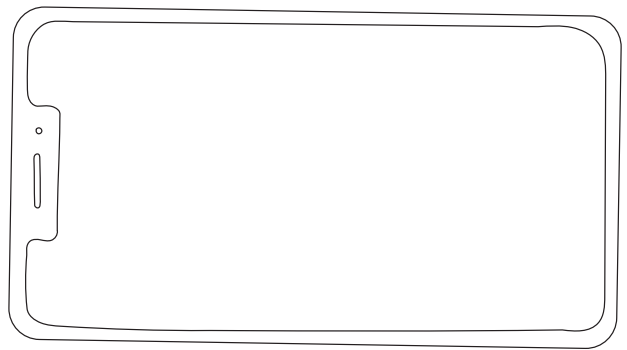

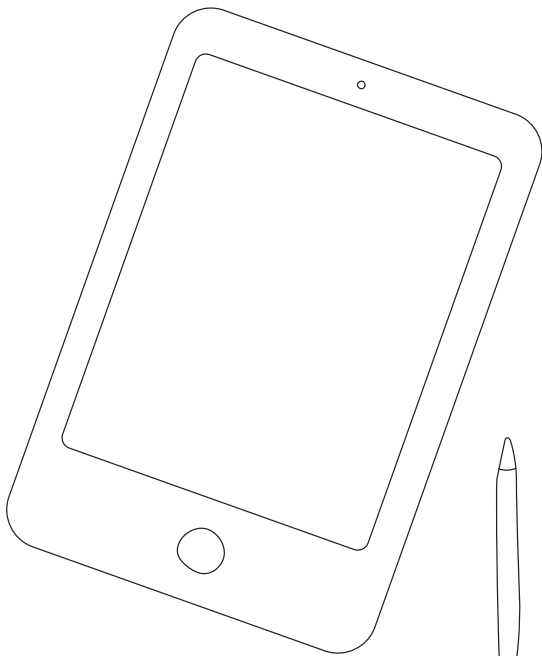

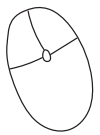

The Digital Divide

This year we've experienced the power of the internet.

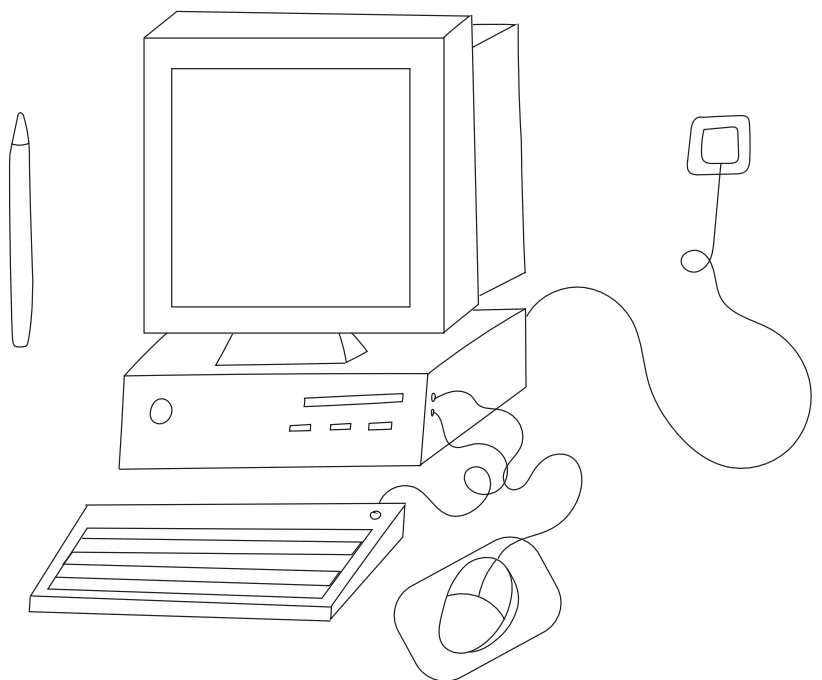

And yet, just 54% of the global population use it.

Less than 1 in 5 people use the internet in the least developed countries.

Remote learning remains out of reach for at least 500 million students.

Climate Action

In April, daily global emissions were down 17% compared to 2019.

By June, they were only 5% lower, even though normal activity had not yet resumed.

Emissions are expected to return to even higher levels after the pandemic.

This year's global lockdowns may result in a 6% drop in gas emissions for 2020, however this drop is still short of the 7.6% reduction for the year required to limit global warming to 1.5C by 2030.

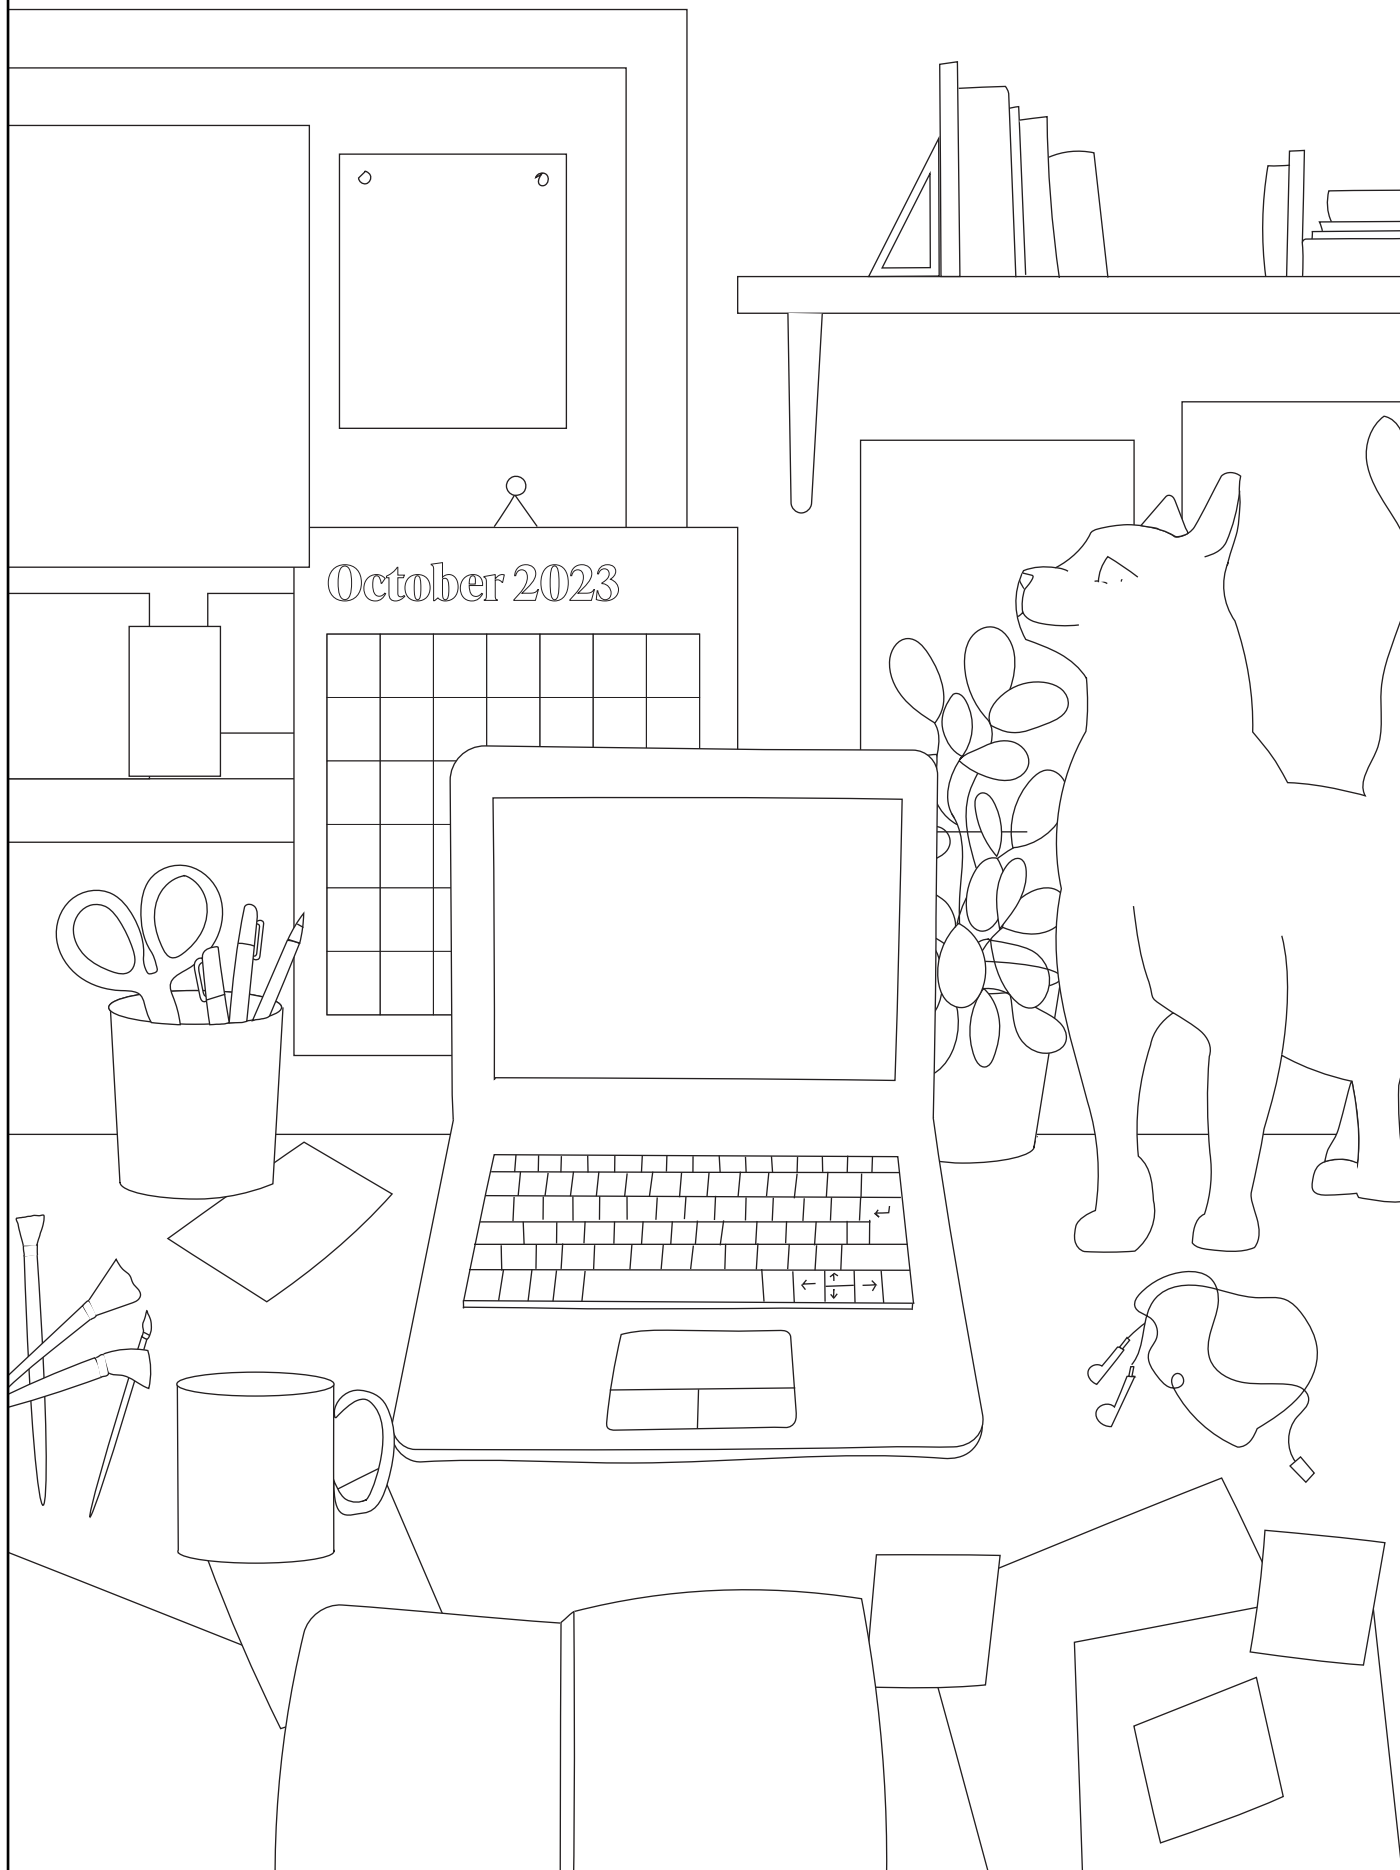

What would your dream planet look like? How would it be different?

Working From Home Colouring Activity

In response to the events of this year, in particular the impact of lockdowns on the environment, Germany is drafting a new law to make working from home a legal right when possible.

Economic fallout from the pandemic has the potential to push an additional 71 million people into extreme poverty. This would be the first time that poverty has increased globally in 30 years.

As of February 2020, only 87 countries had unemployment protection programmes anchored in national legislation, and only 34 of these countries covered the self-employed

School closures kept 90% of children out of school this year and an estimated 379 million children missed out on school meals because of school closures during the pandemic.

Women account for 70% of health and social workers. Yet in pandemic related leadership roles, they make up 25% in national parliaments and 35% in local governments.

Using their satellite data, the National Institute of Space Research, found that 64% more land was cleared in the Amazon in April this year compared to the same month in 2019.

What do you want the future to be?
